# TRANSFER TROLLEY

# TRANSFER TROLLEY

**Safe Working Load**  
1 Ton TO 50 Ton

INOVIC Transfer Trolley is a heavy-duty material handling solution designed for safe and efficient transfer of loads within industrial facilities. Engineered with robust fabrication and precision components, it ensures reliable performance, smooth movement, and long service life under continuous operating conditions.

Manufactured from high-quality structural steel, the trolley handles heavy loads with stability and accuracy. It is equipped with durable wheels and efficient drive systems for smooth travel across rails or shop floors.

Suitable for fabrication units, warehouses, and manufacturing plants, it enables safe and efficient material transfer between workstations and production areas.

# High-Performance Transfer Trolley Solutions

Delivering precision-engineered transfer trolleys designed for safe material transfer, smooth movement, and long-term reliability in demanding industrial applications.

# PRODUCT PORTFOLIO

## Electrical Transfer Trolley

Electrical Transfer Trolley is designed for automated material movement using a motorized drive system. Built with a robust structure, it ensures smooth operation, precise control, and reliable performance for heavy-duty applications.

## TRANSFER TROLLEY

## Manual Transfer Trolley

Manual Transfer Trolley is designed for cost-effective material handling. Operated manually, it provides smooth movement and stable load transfer with low maintenance and durable performance.

# TIMELINE

## L&T Group

### PROJECT 01

We have successfully completed the project for 14 Nos. EOT Cranes at L&T. The project was executed in accordance with technical specifications and industry standards, ensuring high performance, safety, and reliability.

## Afcons Infrastructure Ltd.

### PROJECT 03

We have successfully completed the supply and execution of 20 Nos. 20 Ton Capacity Wire Rope Hoists for Afcons Infrastructure Ltd. The project was carried out as per approved technical specifications, ensuring superior performance, operational safety, and long-term reliability.

## Railway Project

### PROJECT 02

We have successfully completed the execution of 6 Nos. Winch Machines (1050 Ton Capacity with 200 Meter Pulling Length) for a Railway Project. The equipment was manufactured and delivered in accordance with stringent technical and safety standards to ensure high performance under demanding site conditions.

## Mechelonic Engineers

### PROJECT 04

We have successfully completed the supply and execution of 42 Nos. 2-Ton Capacity Wire Rope Hoists for Mechelonic Engineers for a Railway Project. The project was carried out in accordance with approved technical specifications and railway safety standards, ensuring consistent performance, operational safety, and long-term durability.

**150+**

# **EXPERIENCED PROFESSIONALS DRIVING OUR OPERATIONS.**

With **150+** experienced professionals driving our operations, we maintain complete control over every stage of manufacturing. Our skilled workforce combines technical knowledge, hands-on experience, and process discipline to deliver reliable cranes and hoisting solutions that meet international standards and customer expectations.
