# WINCH MACHINE

# PULLING WINCH MACHINE

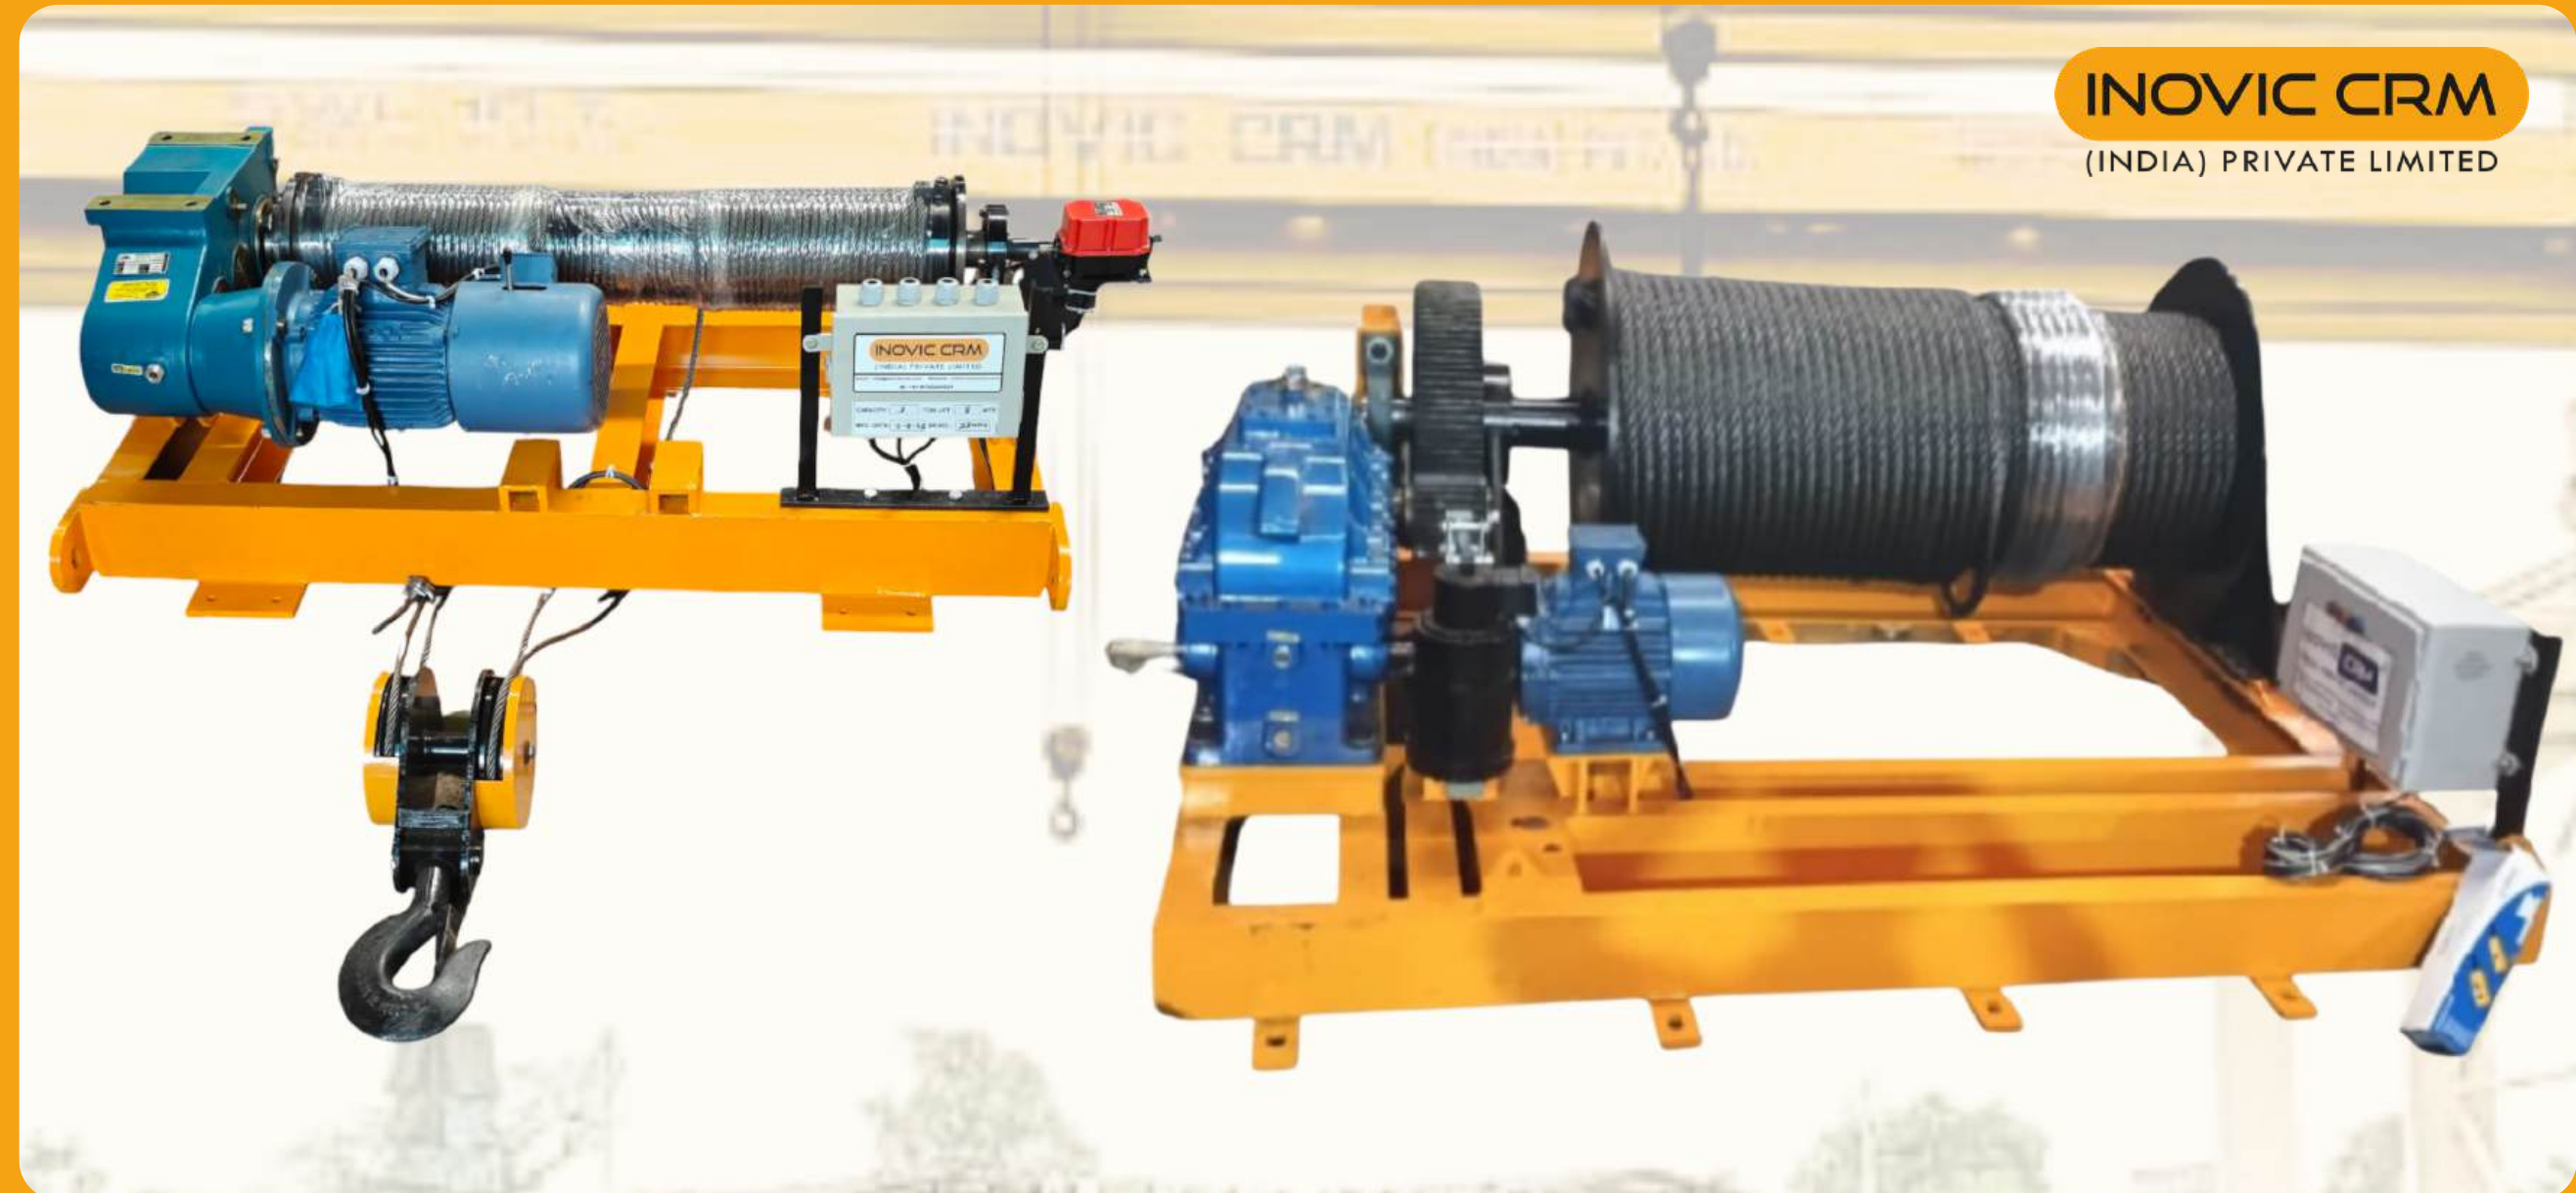

**Pulling Capacity**  
6 Mtr. TO 200 Mtr. Or More

**Safe Working Load**  
1 Ton TO 1100 Ton Or More

INOVIC Pulling Winch Machines are precision-engineered for high-performance industrial pulling and material handling applications. Designed in compliance with IS / DIN standards, they ensure durability, reliability, and long service life under continuous duty conditions.

Built with robust construction and enhanced safety features, the system includes a heavy-duty gearbox, high-tensile wire rope, precision-machined drum, fail-safe braking system, and durable steel structure for smooth and controlled pulling operations.

We also manufacture customized winch machines as per customer requirements, including different capacity ranges, rope lengths, motor ratings, and mounting options, ensuring reliable and efficient performance for various industrial applications.

# LIFTING WINCH MACHINE

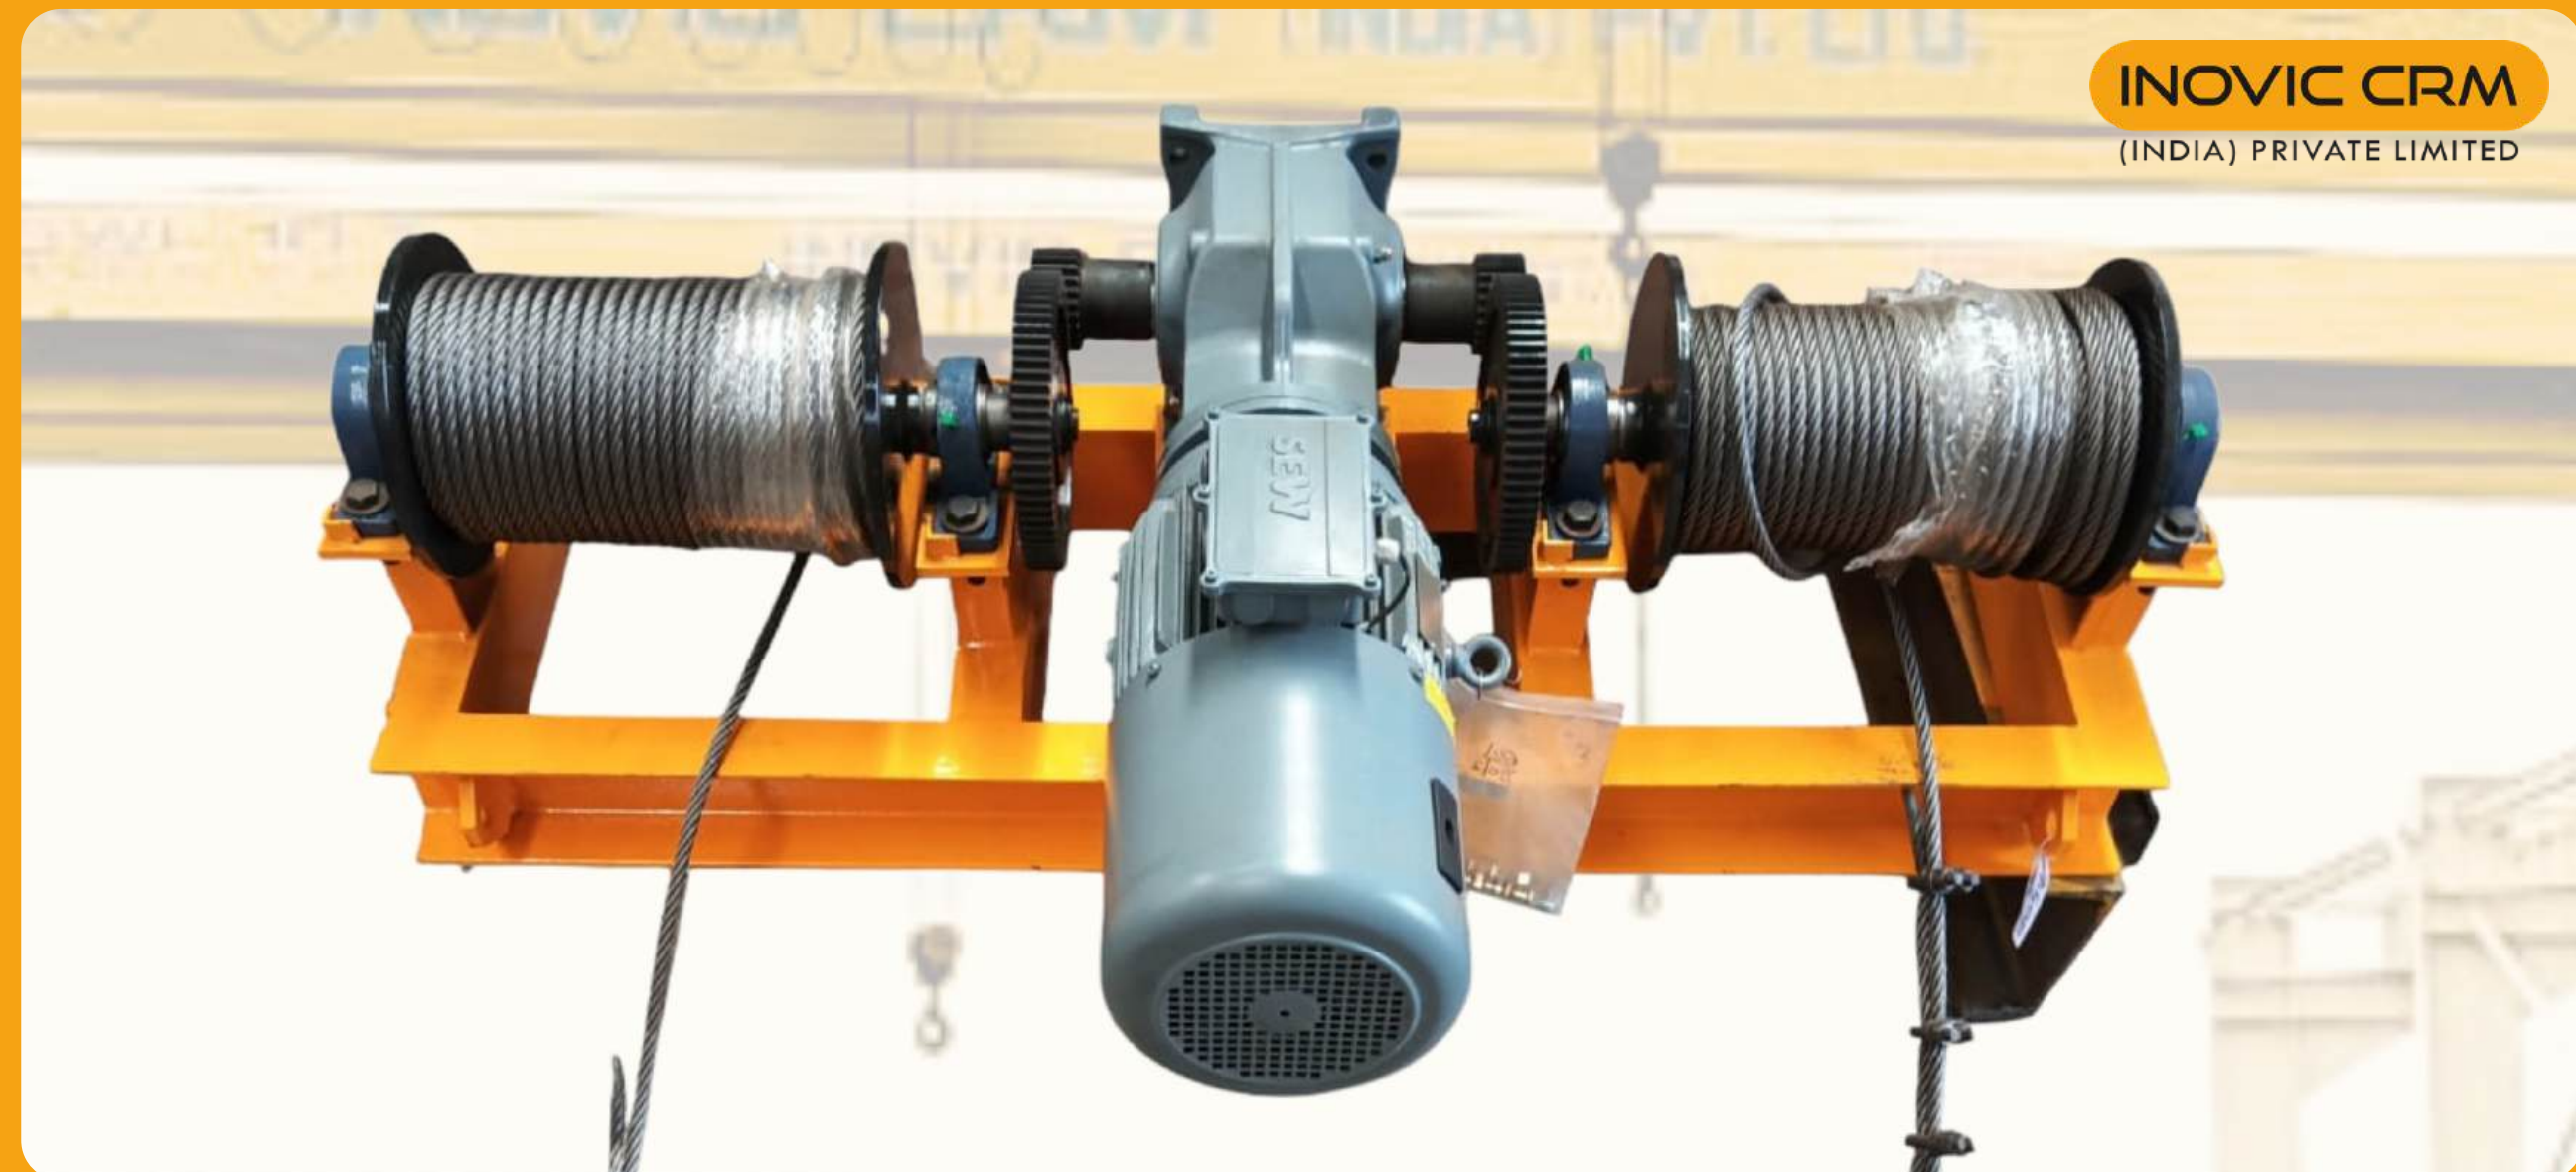

**Lifting Height**  
6 Mtr. TO 50 Mtr. Or More

**Safe Working Load**  
1 Ton TO 500 Ton Or More

INOVIC Lifting Winch Machines are designed for efficient and reliable industrial lifting applications. Manufactured in accordance with IS / DIN standards, they provide high durability, consistent performance, and long service life even under demanding working conditions.

The machine is built with a robust steel structure, heavy-duty gearbox, precision-machined drum, high-tensile wire rope, and a reliable braking system to ensure smooth, controlled, and safe lifting operations.

We also offer custom-designed lifting winch machines as per customer requirements, with options for different load capacities, lifting heights, motor specifications, and mounting arrangements, making them suitable for a wide range of industrial applications.

## /1 Heavy-Duty Construction

Robust fabricated steel structure ensures high strength, durability, and long service life under continuous industrial operations. Designed to withstand tough working conditions, providing consistent performance and structural reliability.

## /2 High Load Handling Capacity

Designed for efficient lifting and pulling applications with stable performance across various capacities. Ensures smooth load movement and dependable operation in different working environments.

## /3 Powerful Motor Performance

Equipped with high-efficiency electric motor ensuring smooth operation, low noise, and energy-saving performance. Provides reliable and consistent output for continuous duty applications.

## /4 Precision Gearbox System

Heavy-duty gearbox (e.g., Elecon/Rotarq type) provides high torque transmission with minimal maintenance requirements. Ensures smooth power transfer and long-lasting operational efficiency.

# High-Performance Winch Machine Solutions

Delivering precision-engineered winch machines designed for reliable pulling and lifting performance, operational safety, and long-term industrial durability.

# PRODUCT PORTFOLIO

## Lifting Winch

Manufactured with a heavy-duty fabricated steel structure, we offer winch machines customized as per customer requirements. Designed for durability and smooth lifting operations, ensuring reliable performance in various industrial applications.

## Pulling Winch

We have successfully manufactured pulling winch machines up to 1050 ton capacity with 700 mtr pulling length. Built with a robust structure, it ensures high performance, durability, and smooth operation in demanding applications.

# TIMELINE

## L&T Group

### PROJECT 01

We have successfully completed the project for 14 Nos. EOT Cranes at L&T. The project was executed in accordance with technical specifications and industry standards, ensuring high performance, safety, and reliability.

## Afcons Infrastructure Ltd.

### PROJECT 03

We have successfully completed the supply and execution of 20 Nos. 20 Ton Capacity Wire Rope Hoists for Afcons Infrastructure Ltd. The project was carried out as per approved technical specifications, ensuring superior performance, operational safety, and long-term reliability.

## Railway Project

### PROJECT 02

We have successfully completed the execution of 6 Nos. Winch Machines (1050 Ton Capacity with 200 Meter Pulling Length) for a Railway Project. The equipment was manufactured and delivered in accordance with stringent technical and safety standards to ensure high performance under demanding site conditions.

## Mechelonic Engineers

### PROJECT 04

We have successfully completed the supply and execution of 42 Nos. 2-Ton Capacity Wire Rope Hoists for Mechelonic Engineers for a Railway Project. The project was carried out in accordance with approved technical specifications and railway safety standards, ensuring consistent performance, operational safety, and long-term durability.

**150+**

# **EXPERIENCED PROFESSIONALS DRIVING OUR OPERATIONS.**

With **150+** experienced professionals driving our operations, we maintain complete control over every stage of manufacturing. Our skilled workforce combines technical knowledge, hands-on experience, and process discipline to deliver reliable cranes and hoisting solutions that meet international standards and customer expectations.
